

Contact Us

Contact Us Featured list Document Version 1.0

Overview :

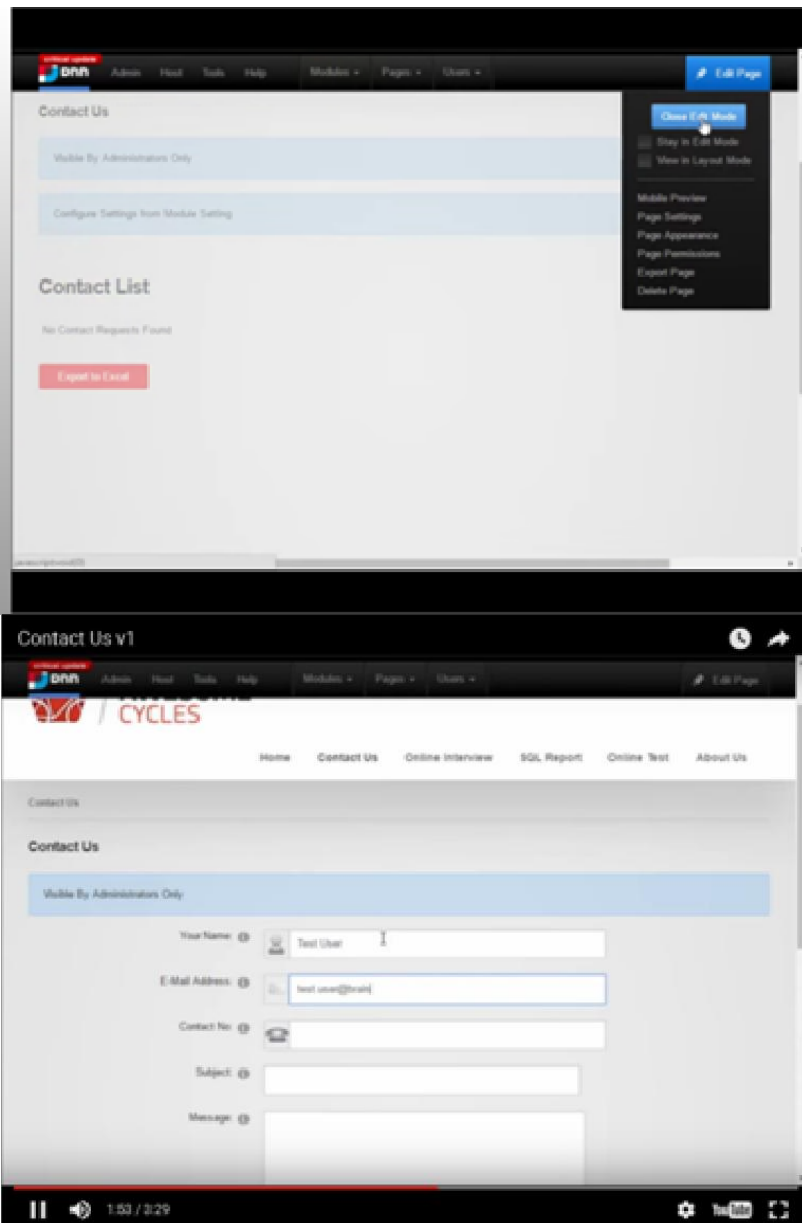

The Contact Us module helps one to implement a contact us page in a website. It allows one to make a contact us request which is send to the appropriate person. One can also view all the contact request made on a website.

Feature List :

1. Contact us module allows the end user to contact the concerned person by adding the details to the contact us page and all these details are captured and the concerned person will receive the mail regarding the same.
2. Specify Attachment Extension & Size
 - When the end user tries to contact the owner by adding any kind of attachments and when the owner exports excel sheet the attachment extension and size is visible and downloadable.
3. Specify SMTP Settings
4. Specify Email TO , CC, BCC Address
 - All this setting is done at the backend and when any user tries to contact the owner the mail is triggered to email id mentioned in TO ,CC and BCC
5. Specify Email Template
 - In this module the user is provided with an email template and the content can be customized as per the requirement.
6. Specify Acknowledgement & Failure messages
 - When contact us module is installed there are three types of notification that are as follows:
 - When any user tries to contact the notification mail is sent to the owner and in return the owner sends the acknowledgement mail to the user
 - When any user tries to contact and the notification mail goes to the owner and the owner is unable to sends Email Failure Message
 - When any user tries to contact and the request is not reachable to the owner Failure Message
7. Export to Excel support
 - The report is generated and this can be exported by the user whenever requires the list consist of details like requested date, name ,email id ,priority and attachments.
8. Added Captcha support.
9. Added Textbox icons.
10. Supports Multiple Instances .
