1. Introduction

1.1. About New Links

New Links module is used for displaying one or more links on your DNN website. Using New Links module you can provide URL links to external as well as internal web pages.

Users can sort links as per their requirement and also pin some of the links. User click tracking is also done. Links can be configured to open in same page or a new window.

1.2. Some of our other Products

Some of our other Products Available in Market and at our website www.dnnextension.com

Performance Rating.

Performance Rating module is Employee rating tool. Using **Performance Rating** module employee in an organization can be rated and there rating can be managed easily.

<http://dnnextension.com/Modules/Performance-Rating>

Task Management

Task Management is a tool for managing Projects, Tasks and subtasks. Using Task Management module you can create and edit Projects, Tasks and Subtasks. Users can also search for Projects and tasks. Emails are through SMTP configuration of the portal.

1.3. Customer Support

All questions related to the module usage, error reports and help requests can be send to us via:

- 1) Email us at: info@brainvire.com
- 2) Write us on our Site: www.dnnextension.com
- 3) Telephone - +1.631.897.7276

2. Module Installation

2.1. Minimum Technical Requirements

In order to install the module, your DotNetNuke portal must meet the following requirements:

The DotNetNuke portal must be version 7.0 & 8.0 Series.

The DotNetNuke portal must be using Microsoft SQL 2008 or higher.

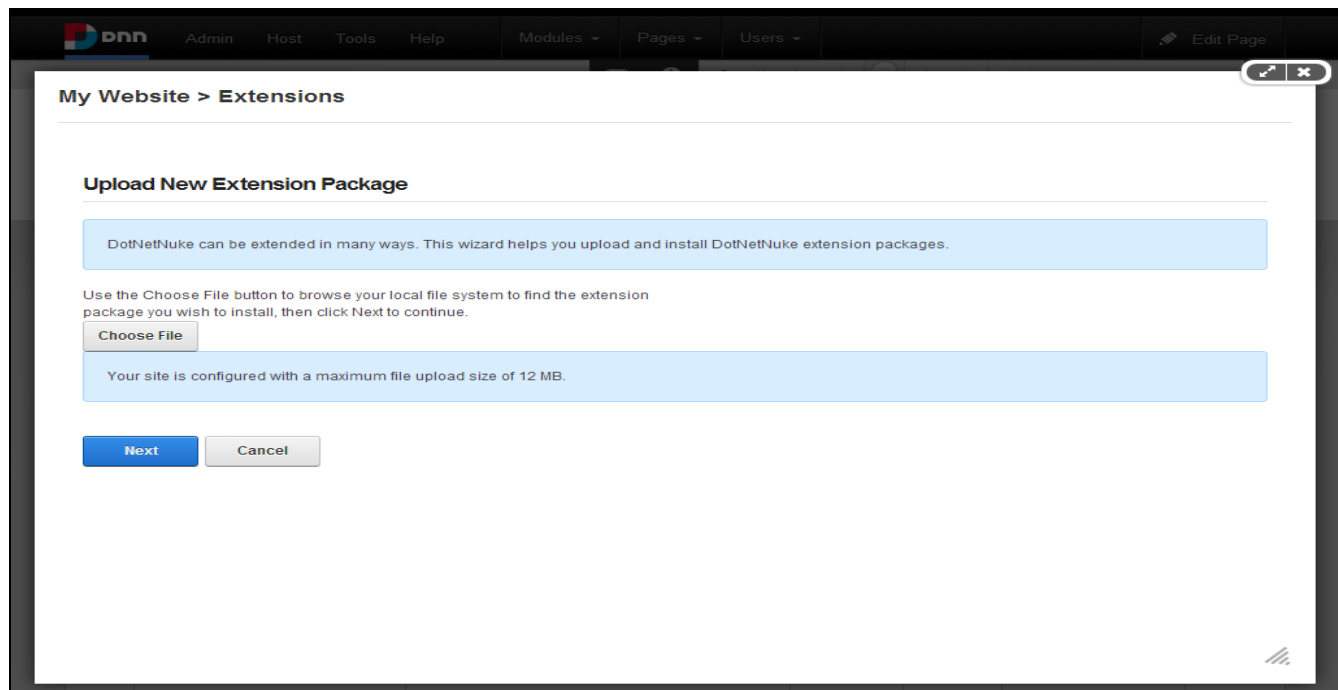

2.2. Installation Steps

To install the module, login to DotNetNuke as a **host**. From the **Host** menu click **Extensions** button. Click on **Install Extension Wizard** button.

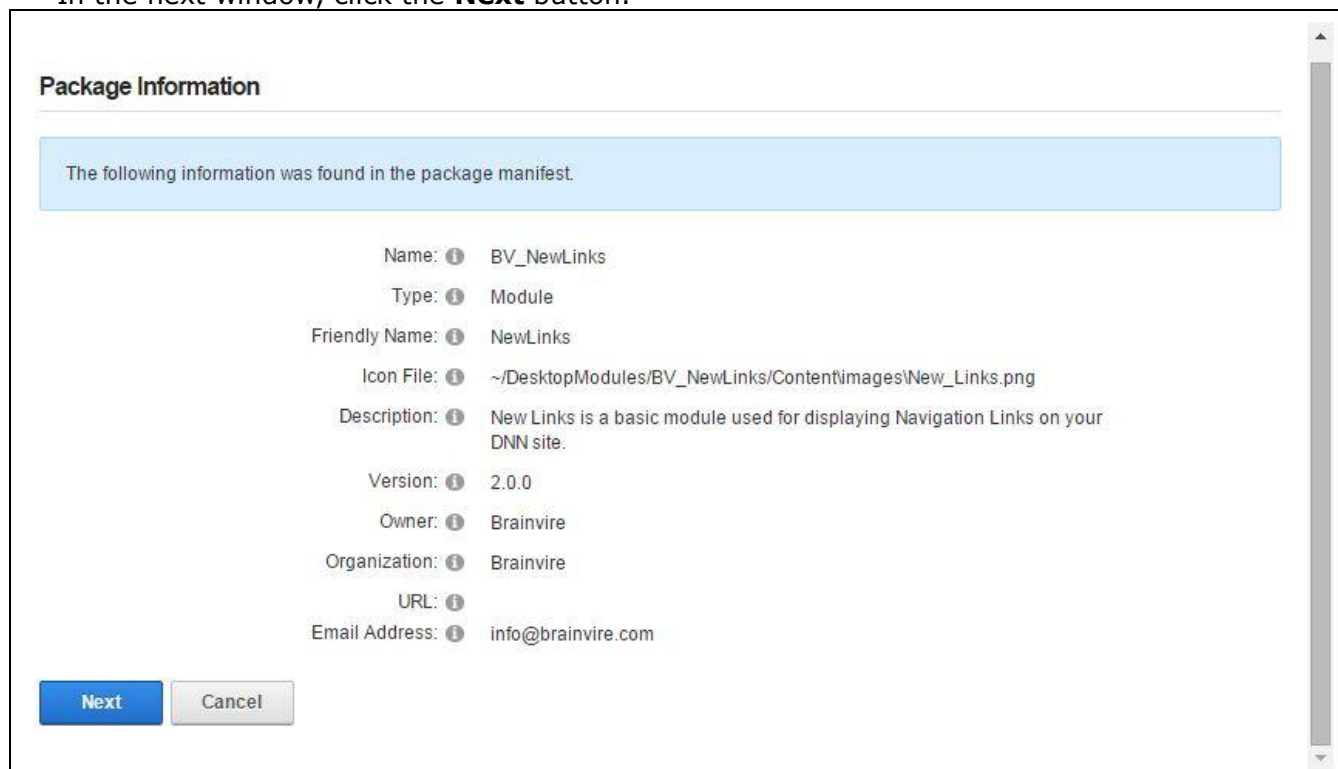

The screenshot shows the DotNetNuke Admin interface. At the top, there is a navigation bar with 'Admin', 'Host', 'Tools', and 'Help' menus. Below this is a user account section for 'SuperUser Account' with a 'Logout' button and a search bar. The main content area features the 'AWESOME CYCLES' logo and a navigation menu with 'Home', 'About Us', 'Our Products', 'Contact Us', and 'Task Management'. The 'Host > Extensions' breadcrumb is visible. The 'Extensions' section contains several buttons: 'Install Extension Wizard' (highlighted in blue), 'Create New Extension', and 'Create New Module'. Below these are tabs for 'Installed Extensions', 'Available Extensions', 'Purchased Extensions', and 'More Extensions'. A blue informational box titled 'Expand All' contains text about an update service and security vulnerabilities. At the bottom, there is a 'Modules' section with a table header showing columns for 'Name', 'Description', 'Version', 'In Use', and 'Upgrade?'. A JavaScript snippet is visible at the very bottom of the page.

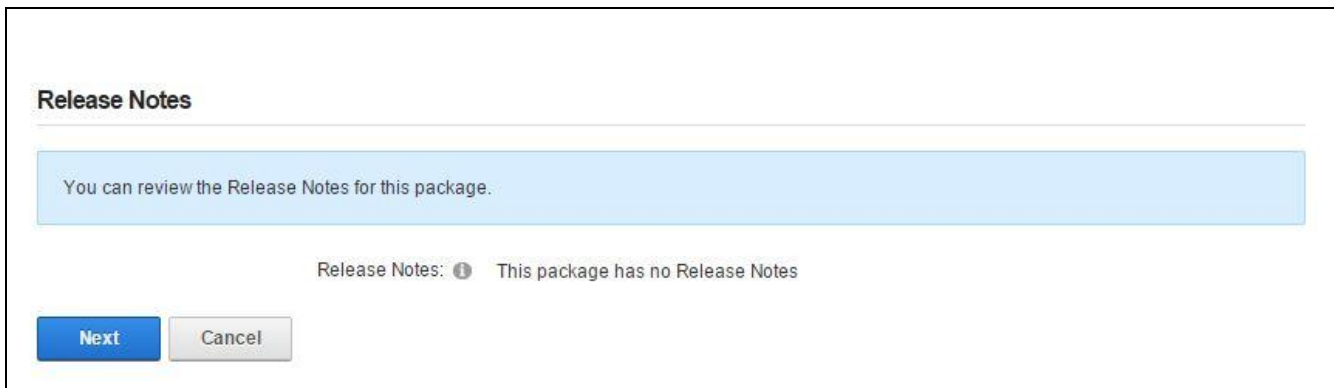

In the next window click the **Browse** button, locate the installation file on your computer hard disk drive and then click the **Next** button.

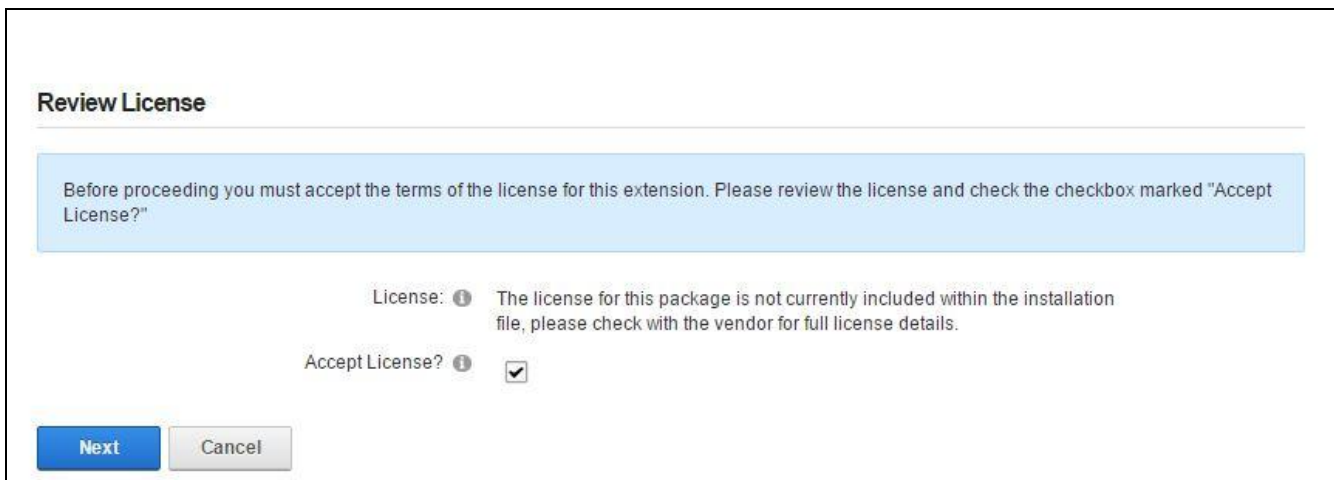

In the next window, click the **Next** button.

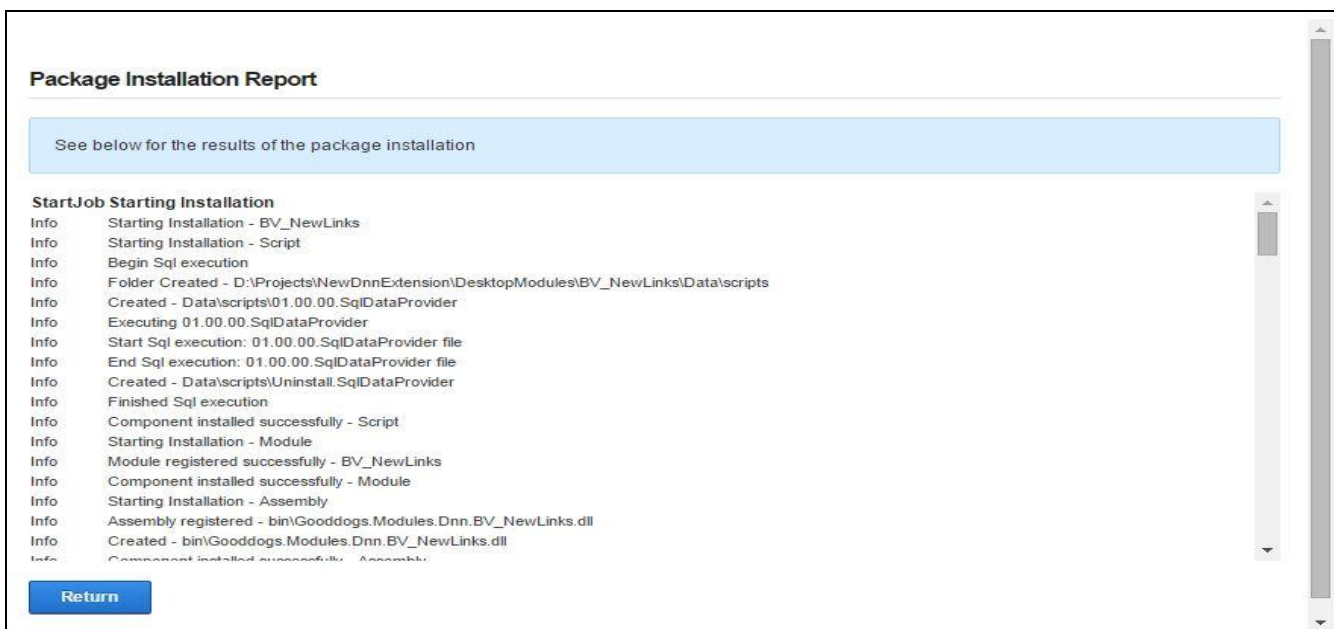

In the next window, click the **Next** button.

Confirm that you accept the license and click the **Next** button.

After successful installation of the module, click the **Return** button.

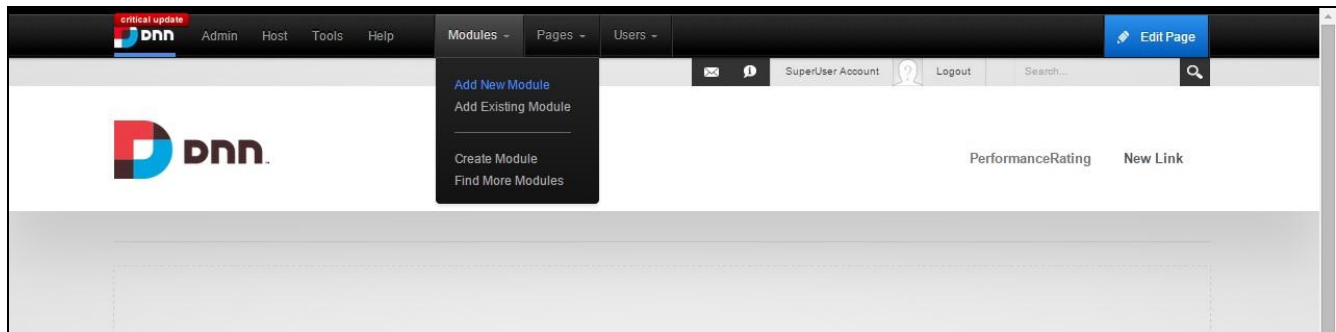

3. Getting Started

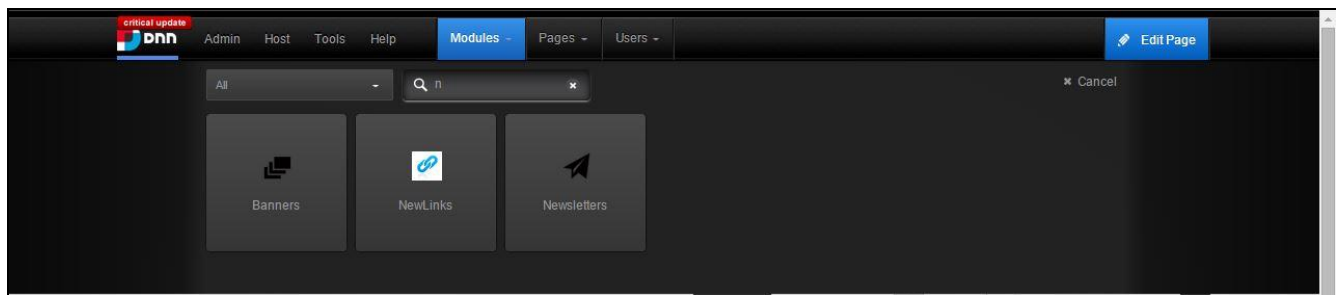

3.1. Placing Module on the Page.

Navigate to the page where you want the module to be seen.

Hover over the **Modules Tab** which is located at the top of the page and click on **Add new Modules**.

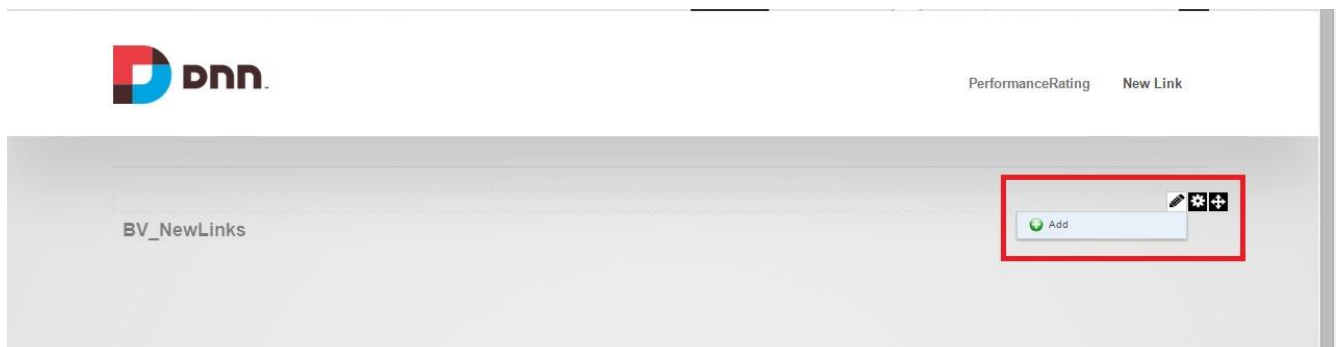

Find the **New Links** Module from the list of modules. And **Drag and Drop** it on the Page.

3.2. Adding a New Link.

Hover over the pencil icon on the right corner of the **module**. And Click on **Add**.

A Pop Up appears as follows:

DnnExtension > New Link > Add a Link

Title

Url Type External URL Internal URL Files On Portal

URL:

Alternate Text:

Image:

Link Type: New Window New Tab Same Page

Description:

Title

Title for the Link. This is a Required Field.

URL Type

Select the URL Type. This is a Required Field.

- a. **External Link:** Points to a location or a URL which belongs to some other site.
- b. **Internal URL:** Points to a URL which is present in the site itself.
- c. **Files on Portal:** Points to a file located on the website.

Alternate Text

Alternate Text for the Link.

Image

Select an image for the link. Select a small image which can fit the screen. If no image is selected a default image will be set for the link.

Link Type

Link Type allows the link to be opened in 3 ways:

- a. **New Window:** Opens the link in a new Window.
- b. **New Tab:** Opens the link in a new Tab.
- c. **Same Page:** Opens the link in the same page.

Description

Fill in some description for the Link.

DnnExtension > New Link > Add a Link

Title:

Url Type: External URL Internal URL Files On Portal

URL:

Alternate Text:

Image:

Link Type: New Window New Tab Same Page

Description:

Fill in all the details and hit the Submit Button.

3.3. Editing a Link.

Note: In order to edit a Link you need to have the edit rights of the page or you need to login as an **Admin / SuperUser**.

Navigate to the page where the **New Links Module** is Located.
Open the page in Edit Mode.

BV_NewLinks

Enter Link Title:

		Google			
		Brainvire.com			
		My Profile			
		My Logo			

Click on the Blue Pencil Icon to edit the Link.

DnnExtension > New Link > Edit a Link

Title:

Title: External URL Internal URL Files On Portal

URL:

Alternate Text:

Image: [Link.png](#)

Link Type: New Window New Tab Same Page

Description:

Activation:

Make the required changes and click on Update Link.

3.4. Deleting a Link.

Note: In order to delete a Link you need to have the edit rights of the page or you need to login as an **Admin / SuperUser**.

Navigate to the page where the **New Links Module** is Located.
Open the page in Edit Mode.

BV_NewLinks

Enter Link Title

		Google			
		Brainvire.com			
		My Profile			
		My Logo			

Click on the Red Cross Icon to delete the Link and the Link gets deleted.

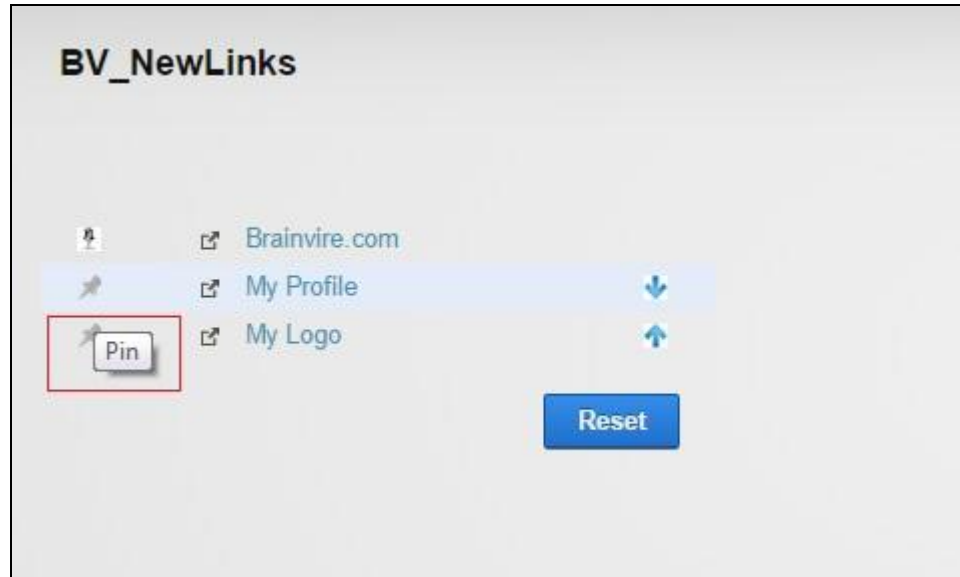

Note: Once a link is deleted it cannot be restored.

3.5. Pining and Unpinning a Link.

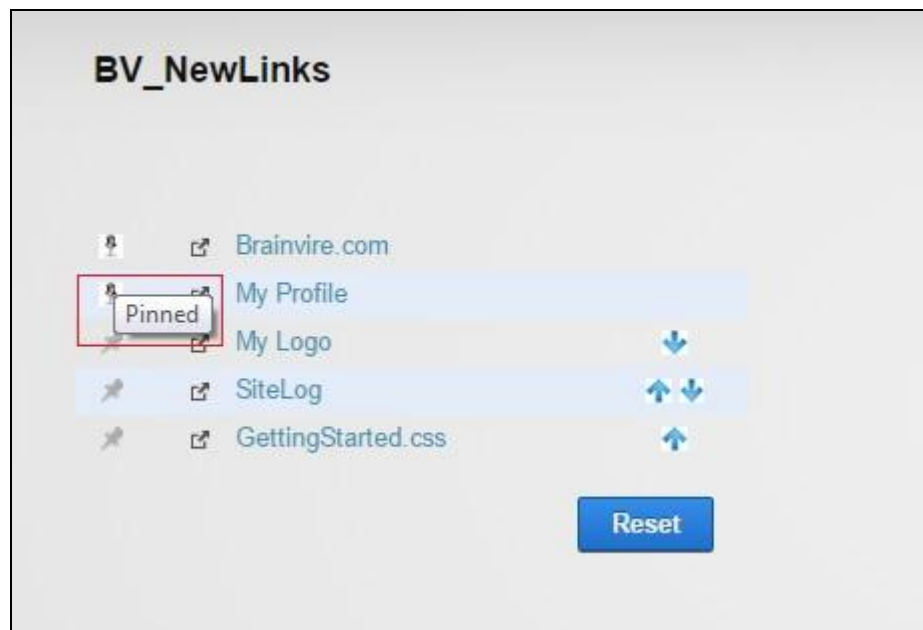

Note: Pining a link causes the link to move up the order. All the **pinned** Links are grouped at the top followed by the unpinned Links.

Each User can Customize their own list i.e. each user can have different set of **pinned or unpinned** links according to their convenience.

In order to pin a link just click the **Pin** Button in front of the Link.

In order to Unpin a link just click the **Pinned** Button in front of the Link.

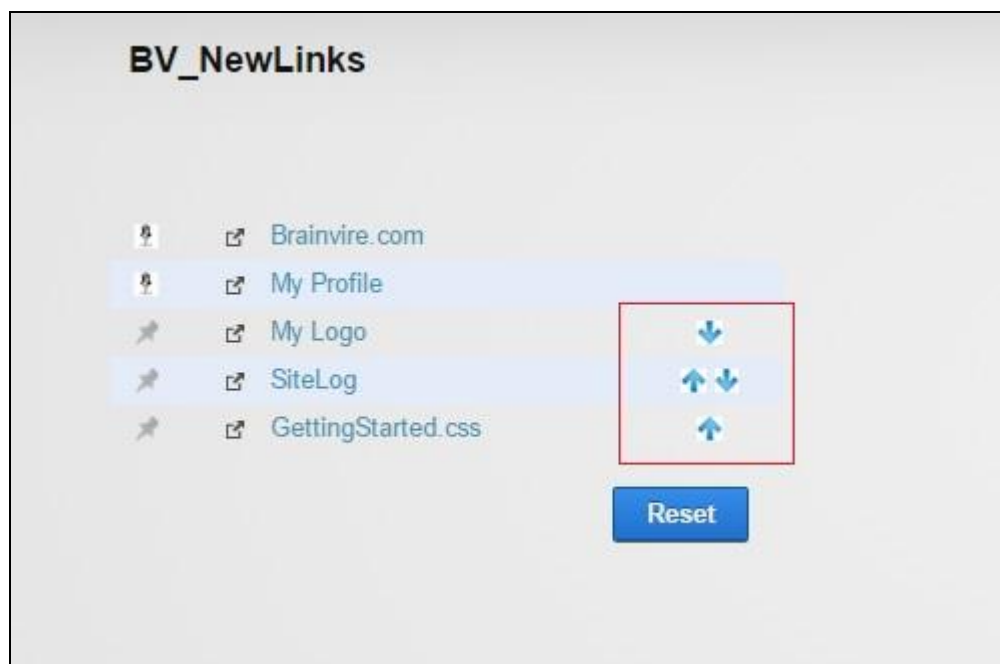

3.6. Ordering and Resetting Links.

Note: Ordering is done only for the **unpinned** Links.

Each User can Customize their own list i.e. each user can have different set of ordering according to their convenience.

In order to sort links a user can click the **arrow** buttons provided. **Up** Button causes the link to move one position upwards. Down Button causes the link to move one position downwards.

In order to Reset the Links to click on the Reset button at the Bottom.

Note: Resetting resets all the ordering and pinning of the links according to the one set by the **SuperUser /Admin**.

4. Uninstalling

To Uninstall the module, login to DotNetNuke Website as a **host**. From the **Host** menu click **Extensions** button. You can see a list of Modules installed into the site.
