1.3. Customer Support

All questions related to the module usage, error reports and help requests can be send to us via:

1. Email us at: info@brainvire.com
2. Write us on our Site: www.dnnextension.com
3. Telephone - +1.631.897.7276

2. Module Installation

2.1. Minimum Technical Requirements

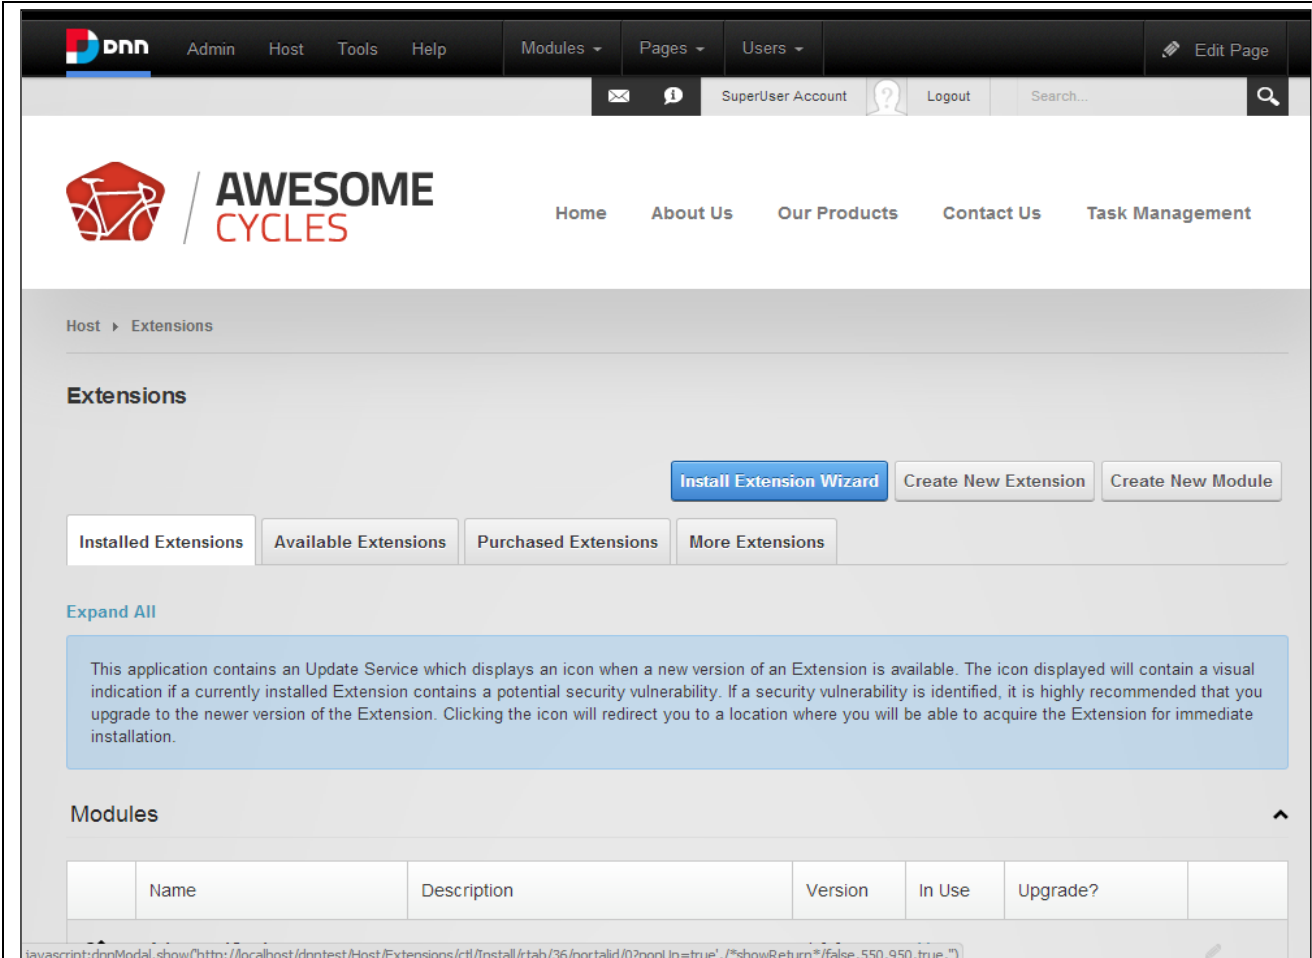

In order to install the module, your DotNetNuke portal must meet the following requirements:

The DotNetNuke portal must be version 7.0 & 8.0 Series.

The DotNetNuke portal must be using Microsoft SQL 2008 or higher.

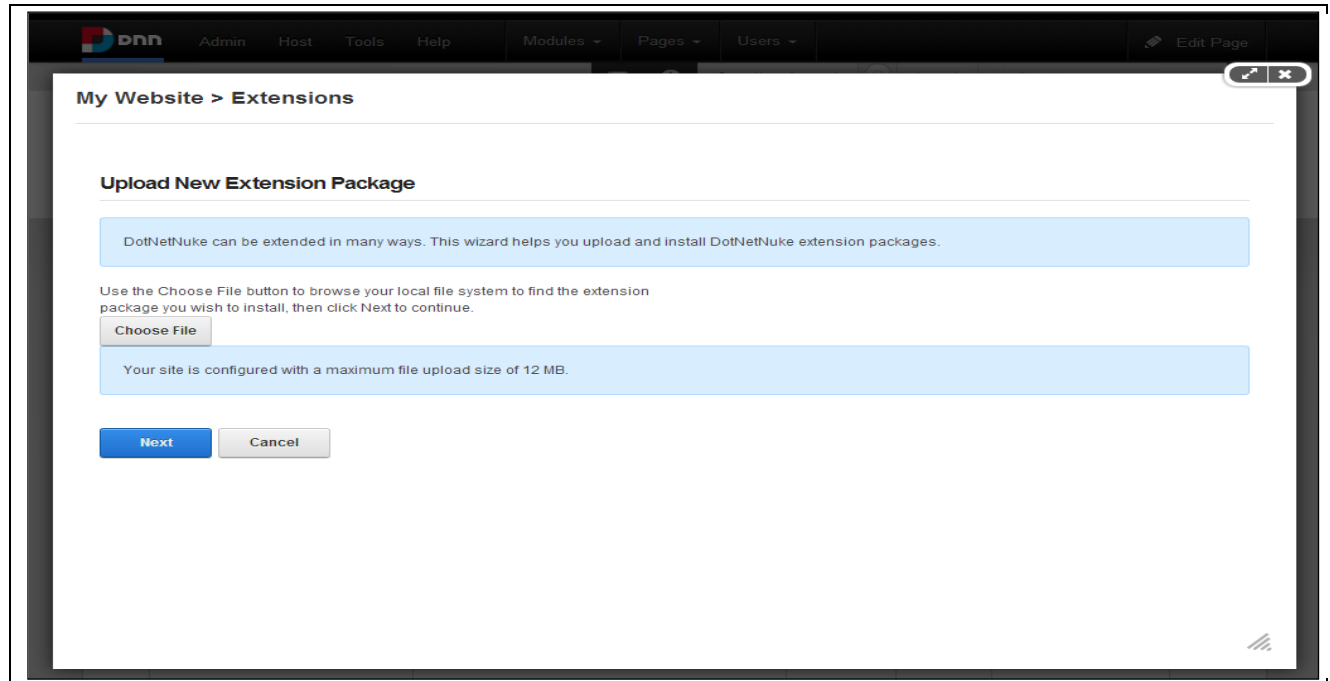

2.2. Installation Steps

To install the module, login to DotNetNuke as a **host**. From the **Host** menu click **Extensions** button. Click on **Install Extension Wizard** button.

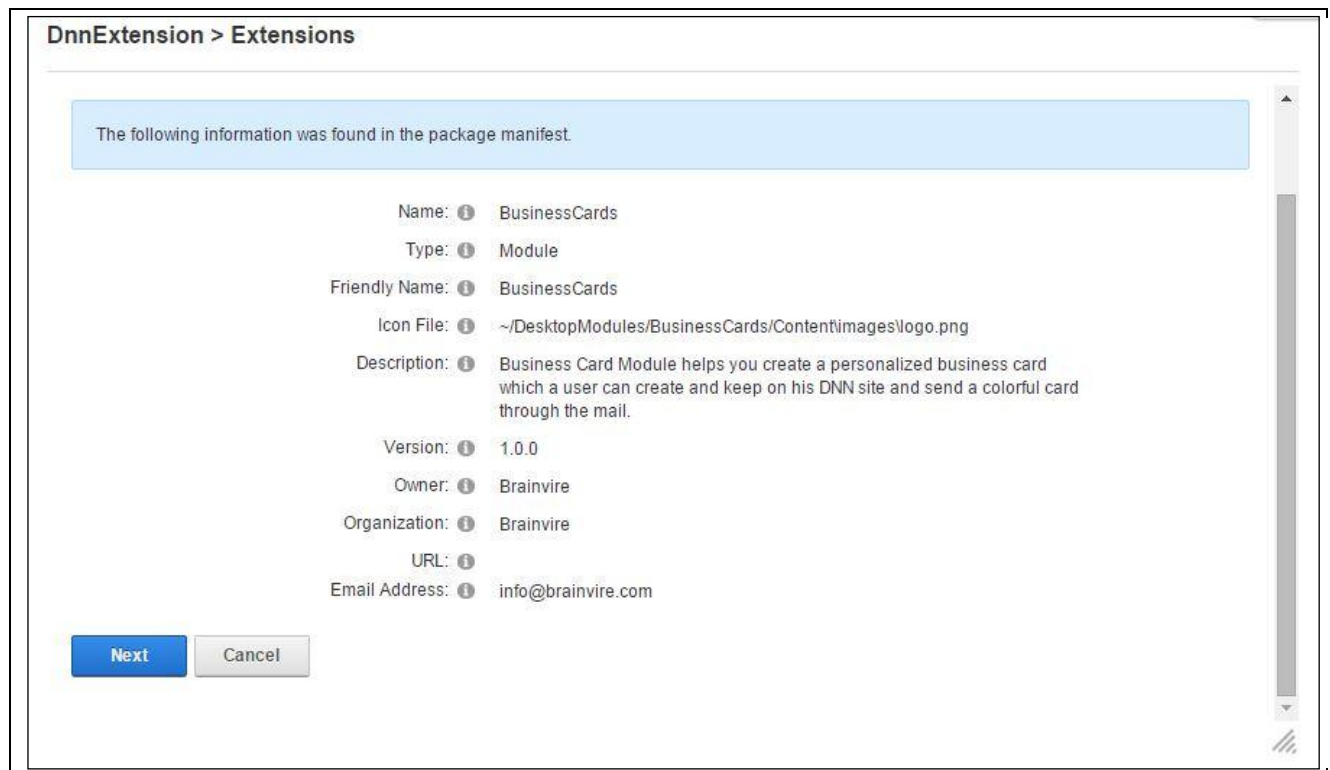

The screenshot shows the DotNetNuke Admin interface. At the top, there is a navigation bar with 'Admin', 'Host', 'Tools', 'Help', 'Modules', 'Pages', and 'Users'. Below this is a user profile section for 'SuperUser Account' with a 'Logout' button and a search bar. The main content area features the 'AWESOME CYCLES' logo and a navigation menu with 'Home', 'About Us', 'Our Products', 'Contact Us', and 'Task Management'. The 'Host > Extensions' breadcrumb is visible. The 'Extensions' section contains three buttons: 'Install Extension Wizard' (highlighted in blue), 'Create New Extension', and 'Create New Module'. Below these are four tabs: 'Installed Extensions', 'Available Extensions', 'Purchased Extensions', and 'More Extensions'. A blue informational box states: 'This application contains an Update Service which displays an icon when a new version of an Extension is available. The icon displayed will contain a visual indication if a currently installed Extension contains a potential security vulnerability. If a security vulnerability is identified, it is highly recommended that you upgrade to the newer version of the Extension. Clicking the icon will redirect you to a location where you will be able to acquire the Extension for immediate installation.' At the bottom, there is a 'Modules' section with a table header: 'Name', 'Description', 'Version', 'In Use', and 'Upgrade?'. A JavaScript snippet is visible at the very bottom of the page: `javascript:dnnModal.show('http://localhost/dnntest/Host/Extensions/ctl/Install/r/tab/36/portalid/0?popUp=true', {'showReturn': false, 550, 950, true, ''})`

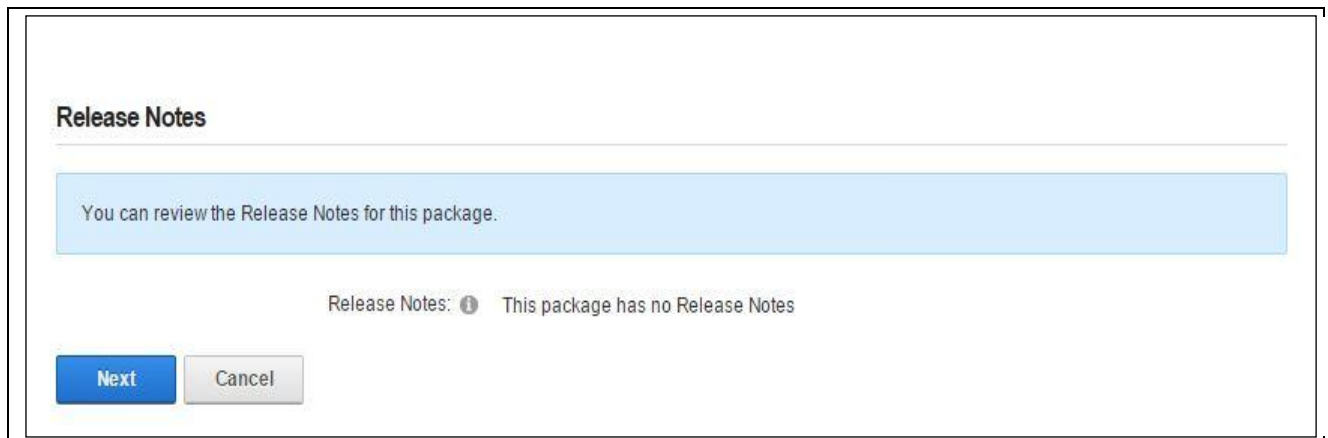

In the next window click the **Browse** button, locate the installation file on your computer hard disk drive and then click the **Next** button.

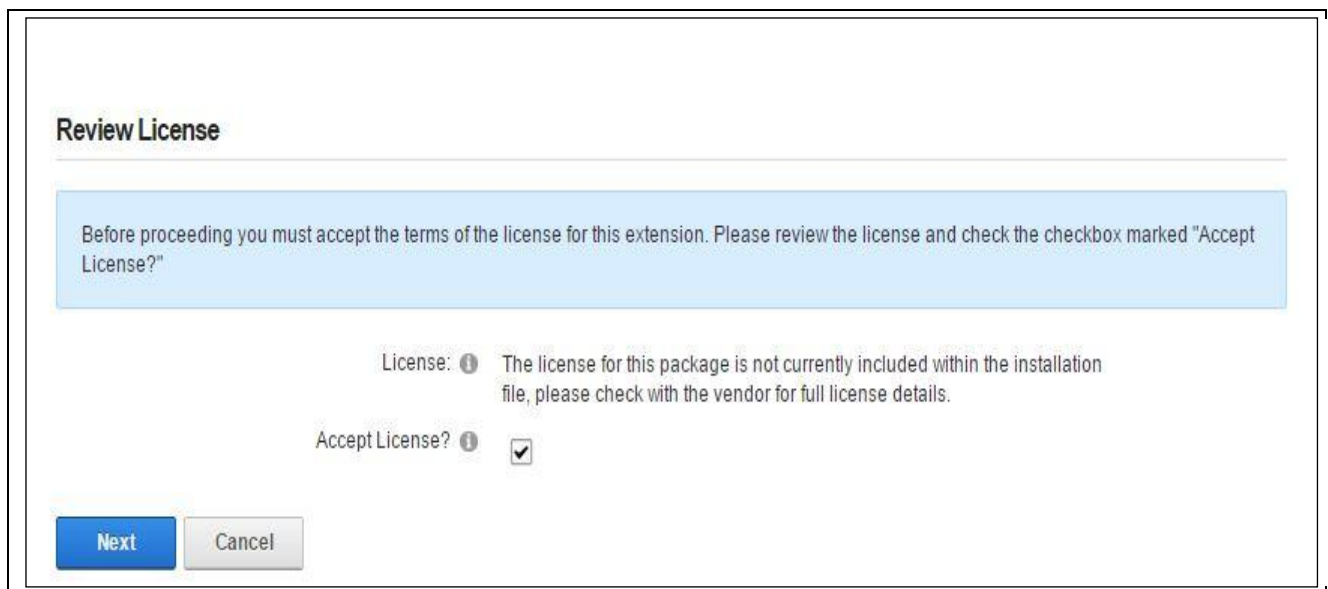

In the next window, click the **Next** button.

In the next window, click the **Next** button.

Confirm that you accept the license and click the **Next** button.

After successful installation of the module, click the **Return** button.

3. Getting Started

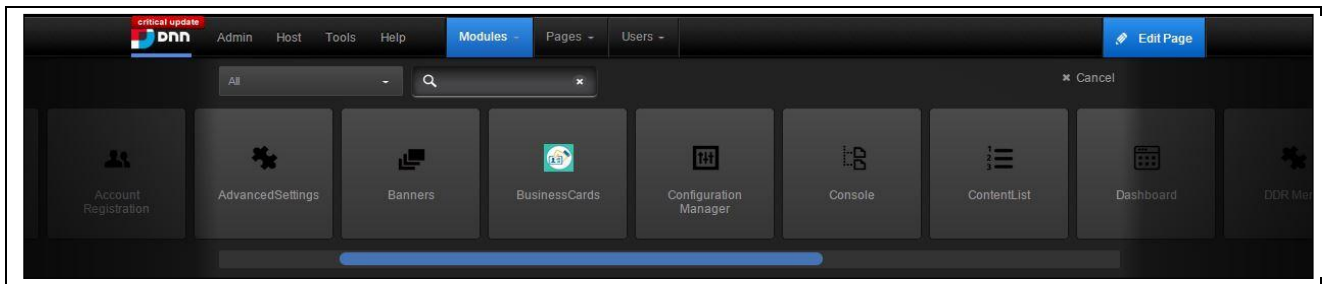

3.1. Placing Module on the Page.

Navigate to the page where you want the module to be seen.

Hover over the **Modules Tab** which is located at the top of the page and click on **Add new Modules**.

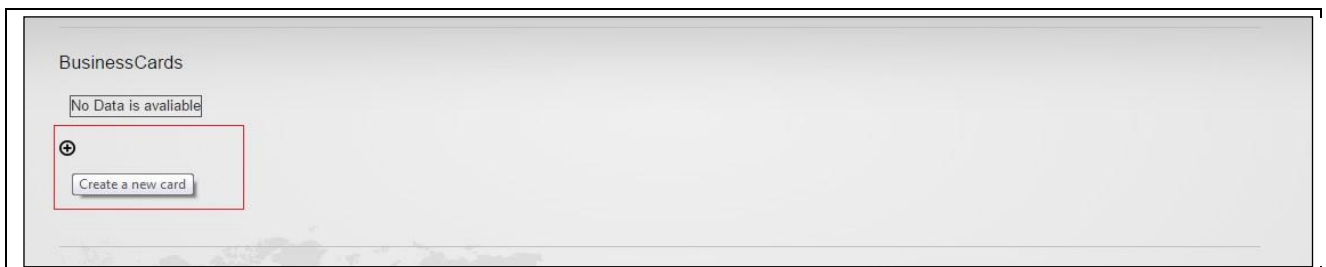

Find the **Business Card** Module from the list of modules. And **Drag and Drop** it on the Page.

3.2. Adding a Card.

Note: In order to Add a Business Card you need to Login into the Website. Each User can Customize their own list of Cards.

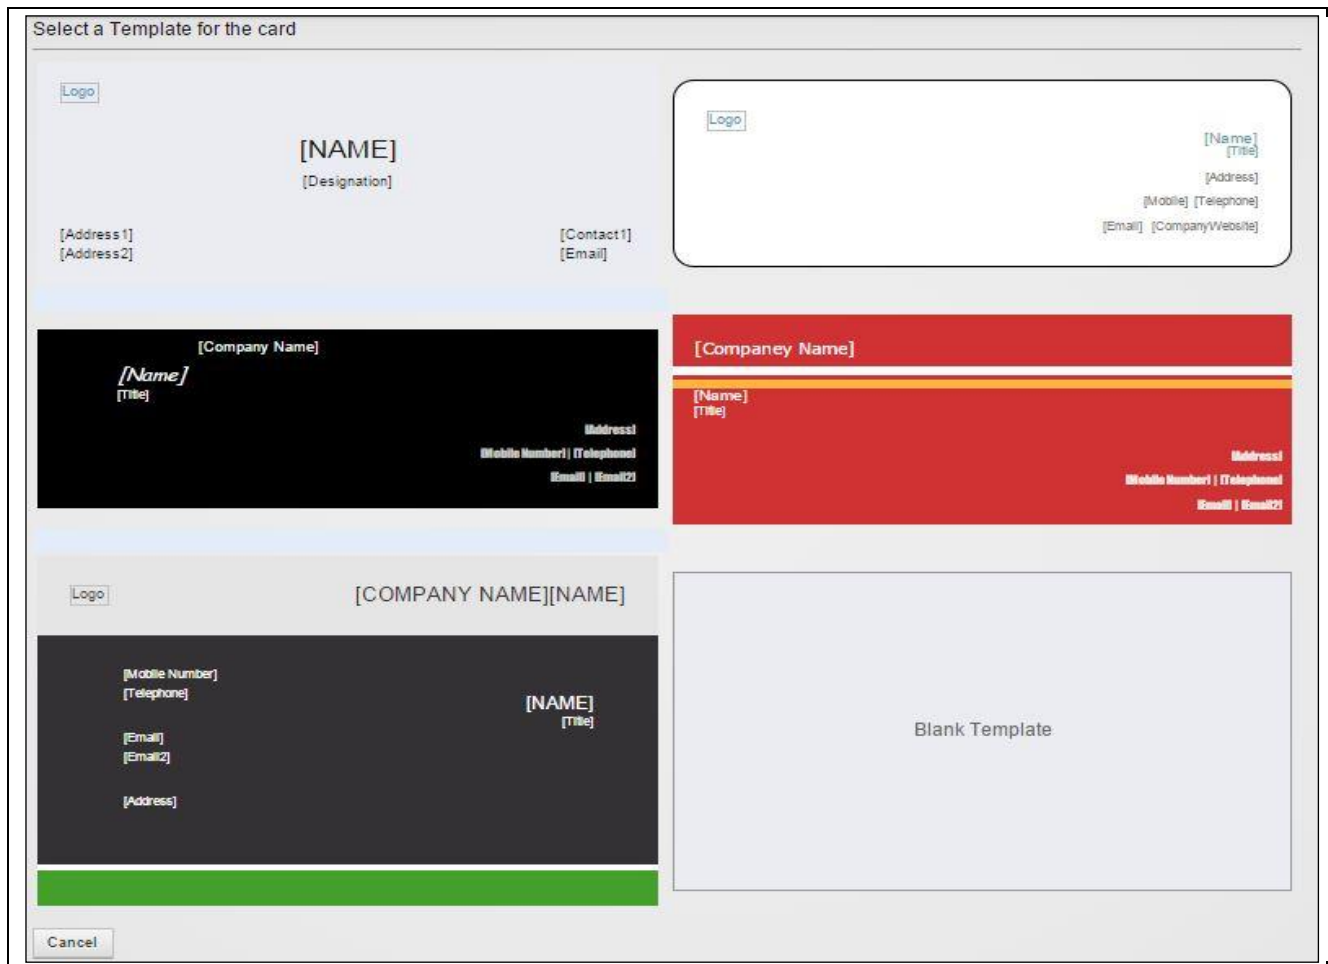

Click on the **Add** Image Button to insert a New Card.

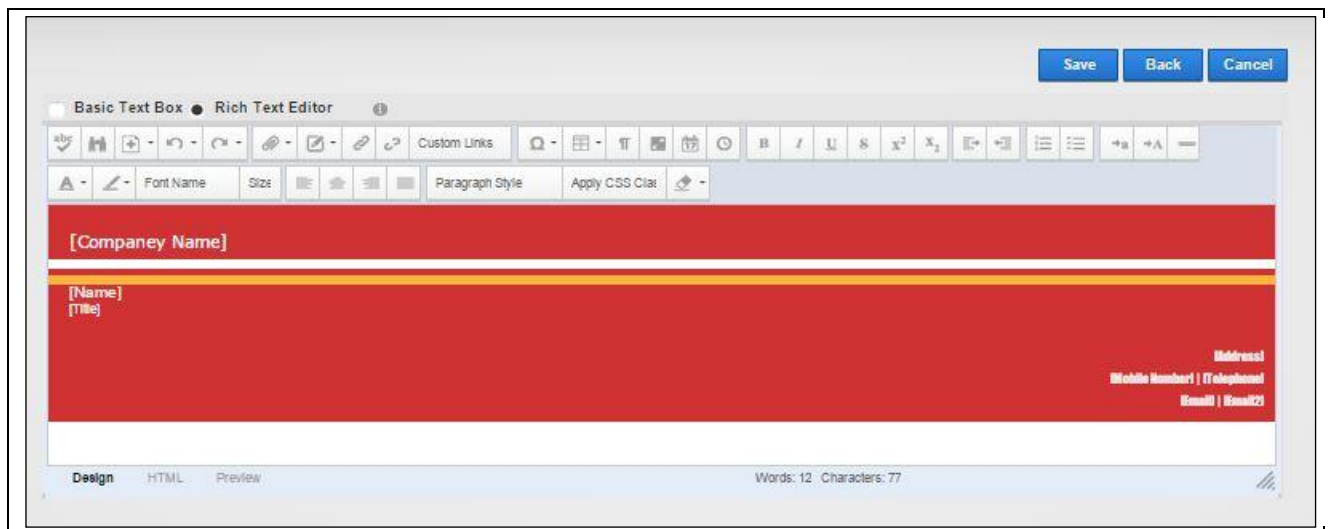

A Pop Up appears as follows:

There are few built in Templates from which the user can select and use.

If the User wants to create his own card there is a Blank Template Option which he can select.

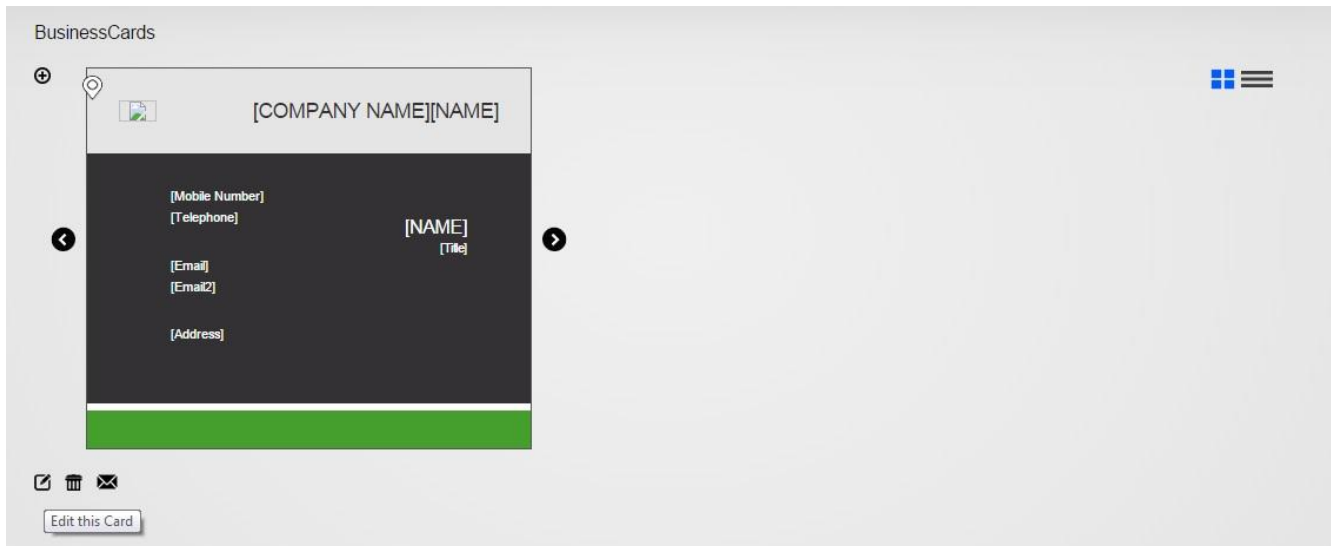

Once the Template is selected You can edit the fields and create the html for the card and Hit Save.

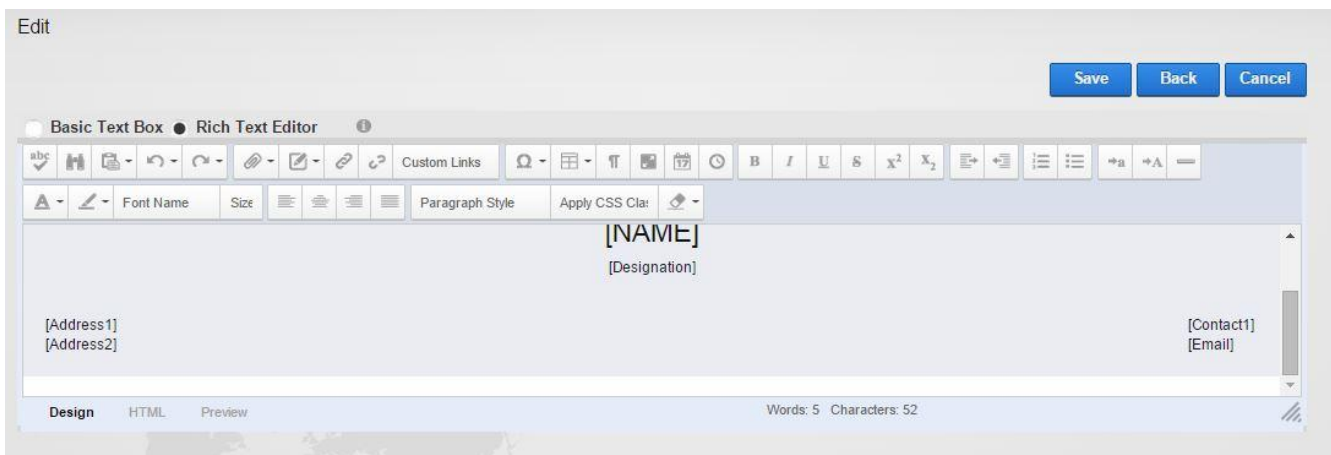

3.3. Editing a Card.

Note: In order to edit a Business Card you need to login into the Website.

Navigate to the page where the **Business Card Module** is Located.
Click on the edit icon at the Bottom of the Card.

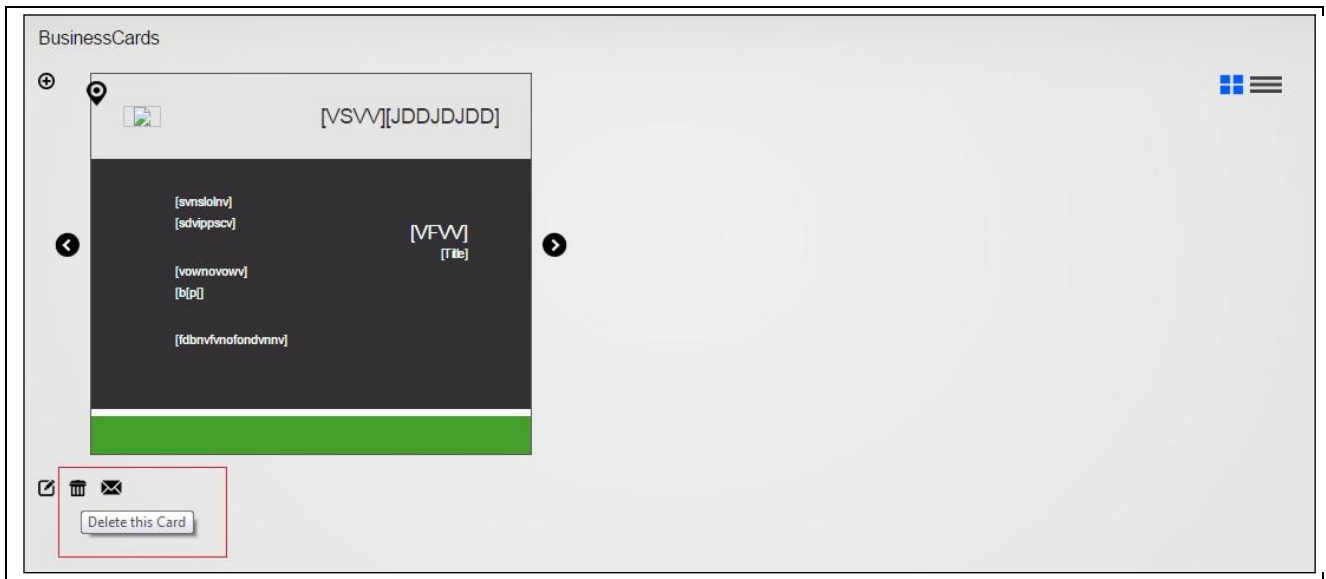

Make the required changes and click on Save Button.

3.4. Deleting a Business Card.

Note: In order to edit a Business Card you need to login into the Website.
Navigate to the page where the **Business Card Module** is Located.

Click on the Delete Icon to delete the Business Card and the Card gets deleted.

Note: Once a Card is deleted it cannot be restored.

3.5. Pining and Unpinning a Card.

Note: Pinning a Card causes the Card to move up the order. Only **one Card** can be Pinned at a Time.

Each User can Customize their own list i.e. each user can have different set of **pinned or unpinned** cards according to their convenience.

In order to pin a link just click the **Pin** Button in front of the Card.

In order to Unpin a link just click the **Pinned** Button in front of the Link.

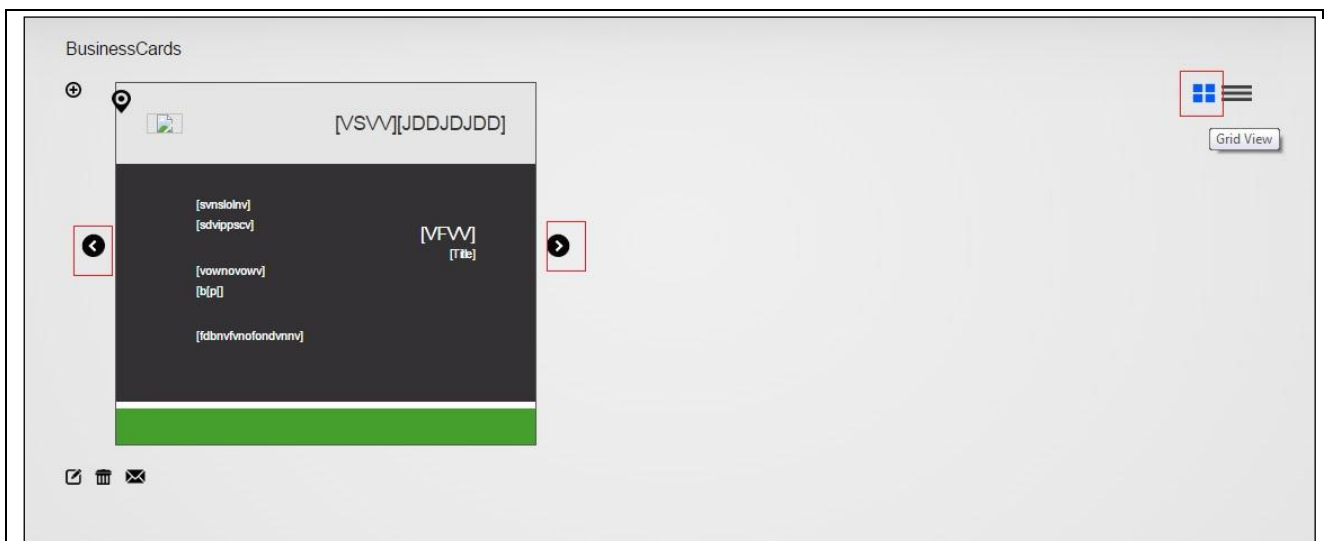

3.6. Navigating Between Lists of Cards.

Note: There are two types of listing one is **Grid View** and other **List View**.

Grid View:

At the top right corner there are two buttons. First one is **Grid View**.

This is an example of **Grid View** we have two arrows besides the card, which allows the user to navigate between the cards.

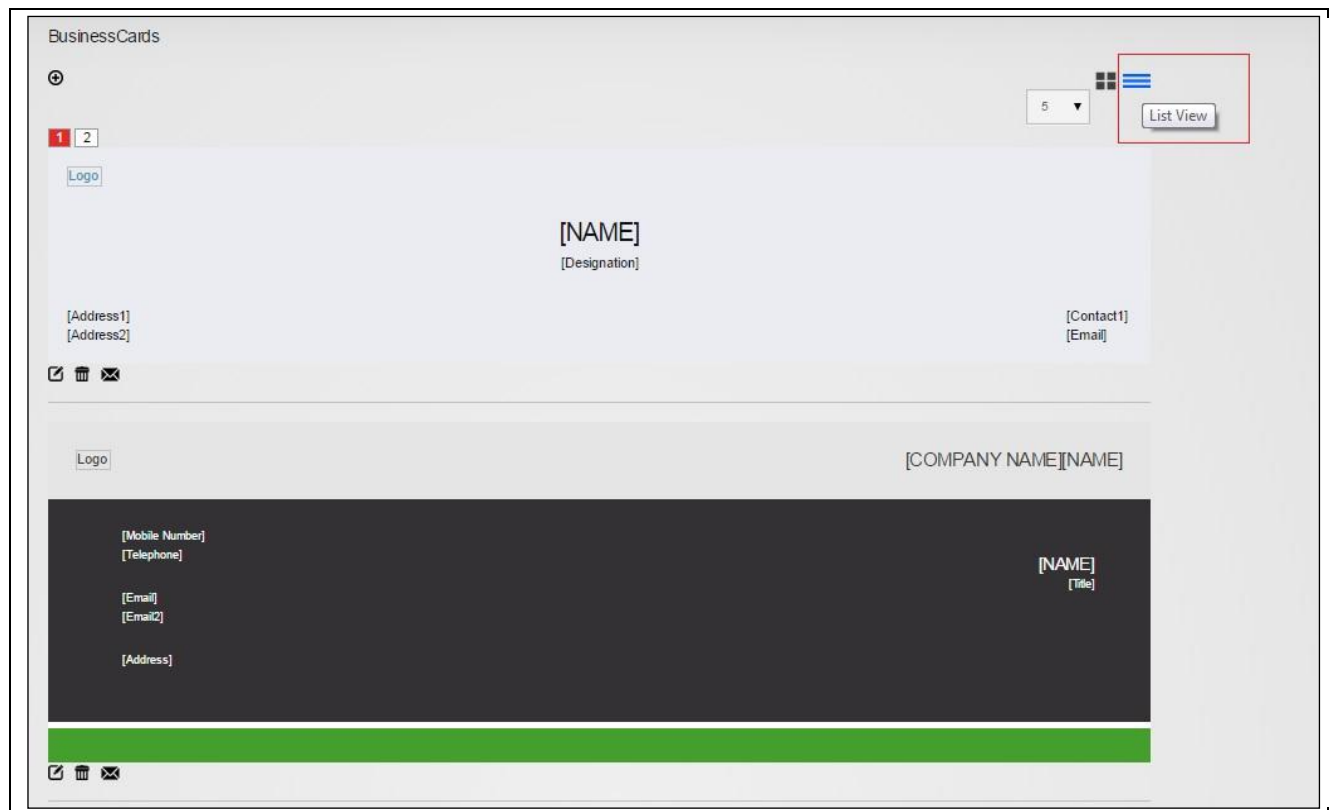

List View:

At the top right corner there are two buttons. Second one is **List View**.

This is an example of **List View**. This displays all the cards in a list format.

We have pagination at the left top of the page and a drop down at the right which allows the user to show a desired number of **Cards** in the List.

3.7. Sending the Card (Emailing the Card).

Note: SMTP needs to be configured for the site to successfully use this feature. Only **Super User / Host** can do the SMTP settings.

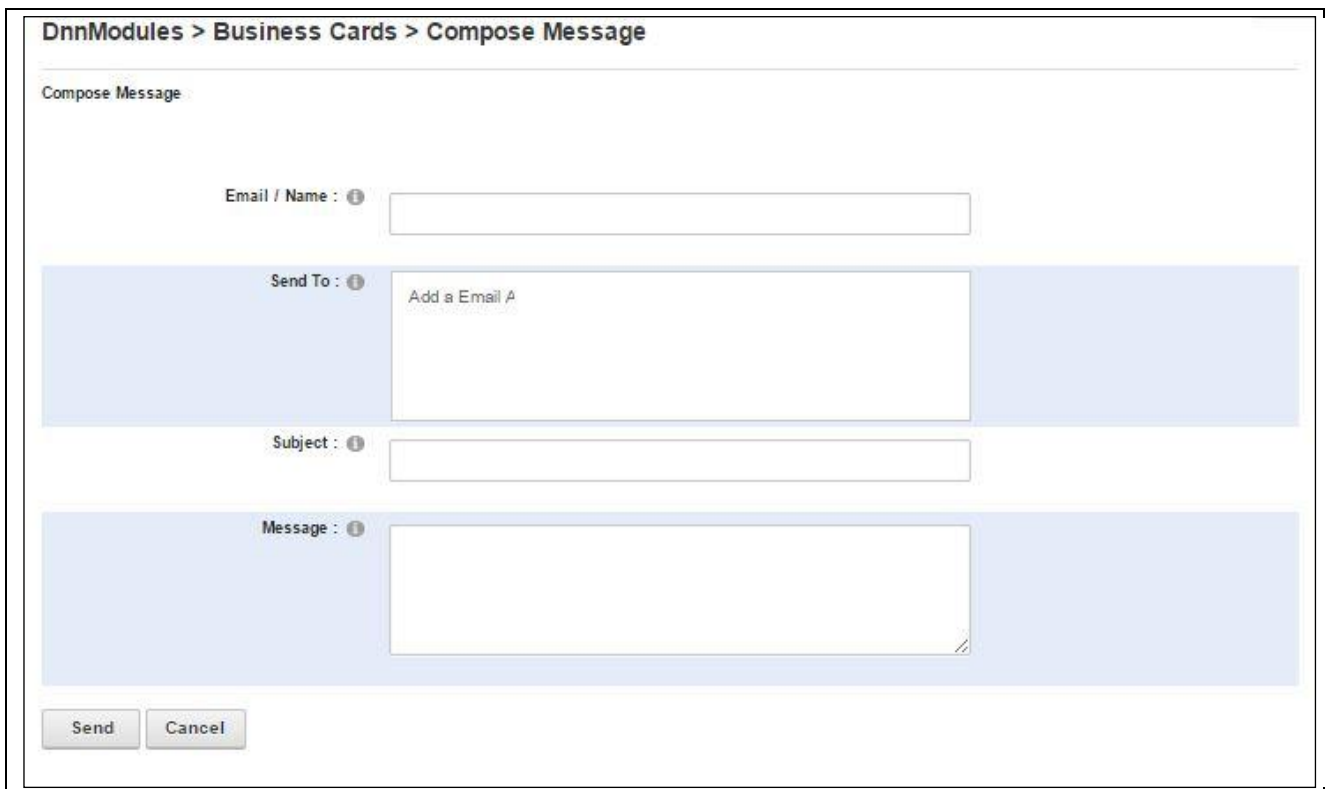

Super User can configure the Setting under **Host** → **Host Settings** → **Advanced Settings** → **SMTP Server Settings**.

Host can configure the Settings under **Admin** → **Site Settings** → **Advanced Settings** → **SMTP Server Settings**.

At the bottom of the **Card** there is a Send this Card Button which allows the user to send the Card via Email. Click on the button to send the **Card**.

A Pop Up screen appears as follows:

Email / Name:

Provide your **Email** address or **Name** that will appear in the **From** Tag of the Mail. This is a Required Field.

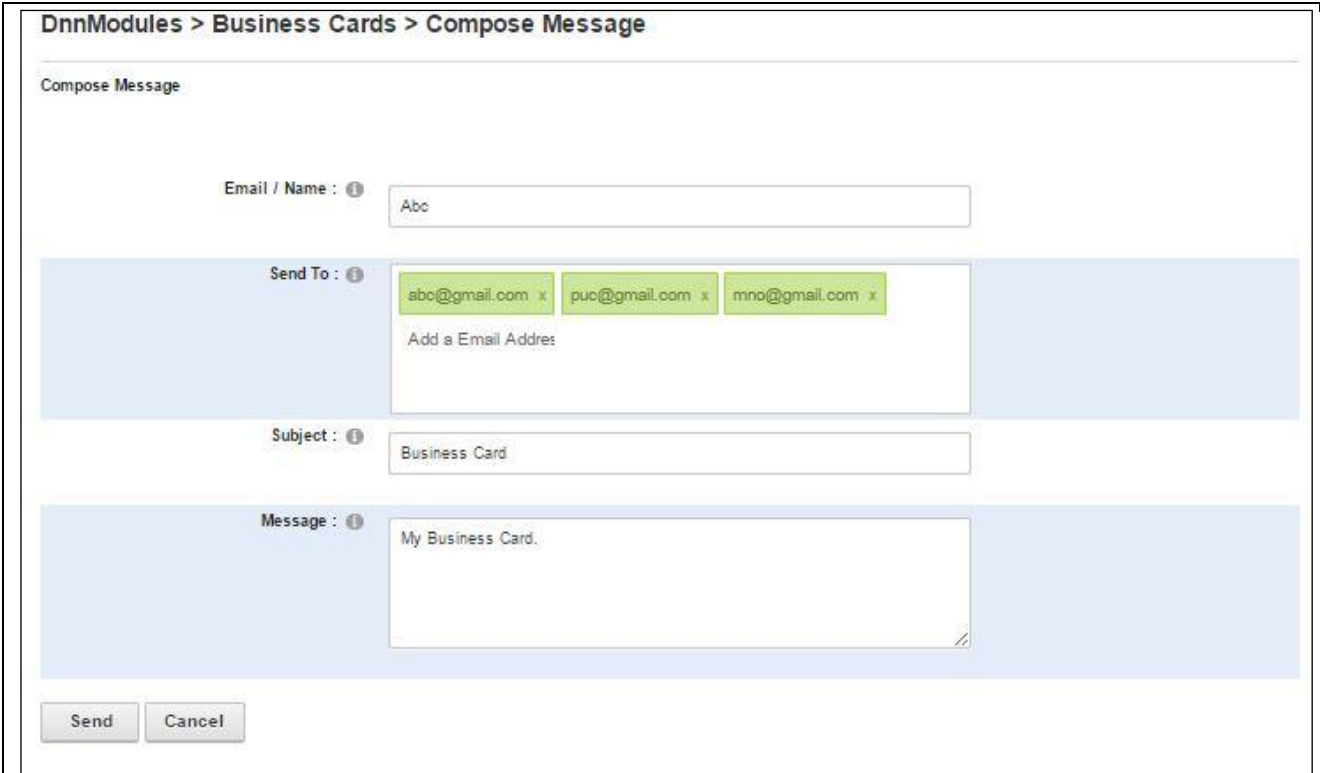

Send To:

Provide recipient Email Address **Email** address here. This is a Required Field.

Send To:
Subject for the **Mail**.
This is a Required Field.

Message:
Message that needs to be sent with the **Mail**.

Once the Details are filled hit the Send Button.
